

RollerBench - a new era in high-end Rollup Stations and added functionality.

RollerBench marks a new generation in manual Rollup Stations, instantly transforming the poolside with its elegant lines and subtle colour choices. The neat bench-like design adds a handy seating area and storage unit while completely concealing the winding mechanism. RollerBench takes pool cover innovation and every day functionality to the next level — the perfect complement to the designer home and stylish outdoor living area.

Benefits of the RollerBench

RollerBench is the perfect accessory for domestic pools fitted with our thermal covers.

- **Ease of use for larger covers:** while a thermal cover is relatively light and easy to use on smaller pools, it is recommended that a RollerBench Rollup Station is added where pools exceed 7 metres in length. This will assist in the removal of the cover from the water as well as ensuring its neat and safe storage once removed from the pool, protecting it from the weathering effects of the sun.
- **Poolside bench:** RollerBench doubles up as a handy poolside bench and storage unit.
- **Prevent wear and tear:** prevents abrasive wear and tear caused by dragging the cover over the pool's coping.
- **Aesthetics:** with RollerBench, the pool cover is no longer visible when off the pool, creating a more chic poolside setting than first generation manual Rollup Stations.

How it works

The RollerBench design incorporates a durable fibreglass frame, under which the Rollup Station and its mechanisms are completely concealed. Using a detachable winder on the side of the unit, the cover is rolled in through the front slit running along the length of the unit (the design can be likened to a letterbox). When rolling out, one simply guides the cover out through the slit and over the pool using the leading edge ropes.

Materials and features

- RollerBench units are custom made to size, up to a maximum width of 5 metres.
- Attachment kit: the cover will require an attachment kit and leading edge ropes to guide the cover over the pool. The RollerBench together with all the accessories provides a quality finish to any thermal cover.
- To accommodate different widths, there can be joins in the mould. A custom mould without any joins can be quoted on where preferred.

Warranty

RollerBench carries a one year warranty but can be expected to last longer with correct care.

Colour Choices

The most aesthetically pleasing colours are White, Linen and Biscuit. Mist Grey and Mid Grey are popular too. Other colours can be chosen from the pallet found here: www.ncsresins.com (under pigment selection for swimming pools) however a signed disclaimer is required to cover any fading or colour wear over time where custom colours are chosen.

Standard colour choices (custom colours also available). Want to add a pattern or custom motif? Chat to us about some unique options!

Using a winder with a detachable handle on the side of the unit, the thermal cover is rolled in effortlessly.

NB: does not come with logo as above—this is a demo unit pictured here.
