HIGH PERFORMANCE COVERS

PRODUCT NAME	THIS POOL OWNER WANTS	BENEFITS	FEATURES
<p>1 SOL+GUARD: solar heating cover Use the sun's energy to heat your pool. Suited to: most shapes, indoor & outdoor pools.</p>	<ul style="list-style-type: none"> To heat the pool water. To improve pool's heat retention properties. A clean, debris-free pool. 	<ul style="list-style-type: none"> Increases water temperature by up to 8°C. Reduced filtration times - saves electricity. Reduces chemical input - water is kept clean and clear of debris, requiring less chlorine. Allows the pool lights to shine through at night and enhance the setting. 	<ul style="list-style-type: none"> Made from durable 500 micron GeoBubble material Clear or light blue (with blue tinge). Not to be used as a child safety cover.
<p>1 ENERGYGUARD- save power & reduce algae The average domestic pool pump consumes 12% of the average household's electricity. EnergyGuard is designed specifically to reduce electricity consumption. Suited to: indoor & outdoor pools.</p>	<ul style="list-style-type: none"> To minimise the pool's impact and 'pack' it away. To halve the pool's power consumption. To save water. An eco-friendly pool with lighter carbon footprint. Warmer water. To winterize the pool. An algae-free pool. Household savings. To shut down the pool in winter. 	<ul style="list-style-type: none"> Power saving - reduce filtration times by 50%. Evaporation reduced by 98%. Chemical consumption reduced by up to 60%. Heat retention and warmer water - extends swimming season by 6 to 8 weeks. Effective way to hibernate a pool - saves on upkeep costs when a pool is not in use for long periods. Cleaner water - reduces dirt and debris collecting in the pool. The pool water is perfect on removing the cover. Inhibits light entry therefore curbs algae growth. 	<ul style="list-style-type: none"> Made from durable 500 micron GeoBubble material. Dark grey top, black underside. Not to be used as a child safety cover.
<p>1 THERMAL COVERS The first step to heating your pool naturally. Suited to: all shapes, indoor & outdoor pools, Jacuzzis.</p>	<ul style="list-style-type: none"> To raise water temperatures. To extend the autumn and spring swimming seasons by 6 weeks. To have a more enjoyable swimming experience in-season 	<ul style="list-style-type: none"> Retains heat and increases temperatures by 6 to 8°C. Evaporation reduced by 98%. Water is kept cleaner, requiring less chemicals - allows for notable household savings. 	<ul style="list-style-type: none"> Made from 400 micron polyethylene with UV inhibitors, designed to withstand harsh climate conditions. For pools over 7 metres in length, a Rollup Station can be added to aid the use of the thermal cover. Choice of local or imported GeoBubble material, providing a product lifespan of 2 to 3 years or 4 to 6 years respectively. Not to be used as a child safety cover.

PRODUCT NAME	THIS POOL OWNER WANTS	BENEFITS	FEATURES
<p>1 SOLID SAFETY COVER</p> <p>The most effective barrier to prevent drownings</p> <p>Suited to: most shapes, indoor & outdoor pools.</p>	<ul style="list-style-type: none"> To safeguard children around the pool. Peace of mind. A hassle free child safety solution. To reduce water, power and chemical costs. 	<ul style="list-style-type: none"> Bears the weight of 2 adults and a child. No cumbersome hooks & eyelets - easy to use. Completely seals off the water, prohibiting access by children. Less garden debris collects in pool. If correctly treated prior to covering, water remains clear and the pH stable. Excellent way to winterize a pool. Can be automated with the EasyRoll rollup station for convenience and push-of-a-button ease of use. 	<ul style="list-style-type: none"> Supported across the pool by aluminium battens that are secured into the PVC cover and rest on the coping, the cover's tension is then tightened with simple ratchet device. Drainage holes prevents rain or sprinkler water from forming a pool on top of the cover. Colour choice of blue, black, green, grey, brown or beige.
<p>1 STARLINE ROLDECK</p> <p>The ultimate luxury in pool covers, Europe's leading fully-automatic pool cover brand.</p> <p>Suited to: pools with 3 straight edges, indoor & outdoor pools. Best installed when building a new pool but retrofits are available.</p>	<ul style="list-style-type: none"> A fully automated pool cover. An elegant pool area to complement a beautiful home. To keep children safe around the pool. Modern convenience. 	<ul style="list-style-type: none"> Push-of-a-button ease of use, can be linked to the home's automation system. Improves water's heat retention capacity. Water is kept cleaner and debris free. In winter, pool maintenance is reduced. On opening the pool after long periods, the water is clean and swim ready. Will increase the value of the property. 	<ul style="list-style-type: none"> A slatted PVC or polycarbonate cover. Weight tolerance of up to 50kg per metre². Slats come in colour choices of blue, white, grey, green, black, and a polycarbonate range of translucent and black is also available.
<p>1 POWERDOME</p> <p>Eliminates the need to build an enclosing structure to keep the ambient air warm. An effective way to simulate an indoor setting.</p> <p>Suited to: Jacuzzis and round or oval pools.</p>	<ul style="list-style-type: none"> An indoor setting without the cost of building. To heat the Jacuzzi or pool naturally. To reduce power and chemical costs. 	<ul style="list-style-type: none"> PowerDome creates a barrier between the outside air and water. The warm 'greenhouse' effect creates a natural heating system. On heated Jacuzzis and pools, heat pump settings can be lowered, allowing power savings. With cleaner water, filtration times and maintenance can be scaled back. Protects the water from cooling elements such as wind and rain. 	<ul style="list-style-type: none"> Made from clear and opaque PVC. Stands between 2,2 and 2,6 m high, allowing space to move around under the dome, slightly lower at the rounded corners. Can be used to protect small children if secured to the coping but not recommended as a drowning prevention measure on its own. Weight ranges from 42kg (smallest) to 93 kg (largest). Available in diameters of 4 metres and 6 metres.
<p>1 LEAFNET/PVC MESH</p> <p>When leaves and garden debris rot in a pool, pH levels and water hygiene are compromised and will require extra chemical input to restore balance.</p> <p>Suited to: all outdoor pools.</p>	<ul style="list-style-type: none"> To prevent leaves and debris collecting in the pool. To reduce water evaporation and save water. To safeguard small pets. 	<ul style="list-style-type: none"> With cleaner water, the time spent on pool maintenance is scaled back. Reduces risk of small pets drowning. Curbs evaporation, which allows for less top ups and water savings. 	<ul style="list-style-type: none"> Made from 55% shade cloth or PVC mesh. Comes in blue or black. Is secured to the coping with hooks and eyelets. Not to be used as a safety cover for children.

PRODUCT COMPARISON TABLE: ROLLUP STATIONS

GYM, SCHOOL OR LARGE POOLS
ACCOMMODATES LANE COVERS
DOMESTIC POOLS
FOR USE WITH THE POWERPLASTICS SOLID SAFETY COVER

PRODUCT NAME	THIS POOL OWNER WANTS	BENEFITS	FEATURES
<p>1 JUPITER ROLLUP STATION Pool covers over 7m in length can require extra manpower to operate. A Jupiter Rollup Station adds convenience as well as functionality and a storage solution. Suited to: domestic pools exceeding 7m in length.</p>	<ul style="list-style-type: none"> To use a large thermal cover quickly and effortlessly. To correctly store a large cover so as to prevent wear and tear when off the pool. 	<ul style="list-style-type: none"> Makes the pool cover easy to place on and remove from the pool. Extends the lifespan of the cover. Prevents cover damage while in storage/ off the pool. Reduces the amount of water lost due to run off when removing a thermal cover. 	<ul style="list-style-type: none"> Made from aluminium and stainless steel. Attachment kit and leading edge kit with reinforcing material on the pool cover ensure quality connections with the Rollup Station. Secured to paving by stainless steel anchor bolt and ground anchor. On castors/wheels for easy movement.
<p>1 MERCURY ROLLUP STATION Excellent way to make a pool cover convenient to use and to ensure correct storage when the cover is off the pool. Suited to: larger pools such as schools and gyms.</p>	<ul style="list-style-type: none"> To open a large covered pool for swimming quickly and effortlessly. To correctly store a large cover when off the pool, to prevent premature ageing due to wear and tear. 	<ul style="list-style-type: none"> Aids the use of large covers. Extends lifespan of cover. Protects the cover while in storage/ off the pool. Reduces the amount of water lost due to run off when removing a large thermal cover. 	<ul style="list-style-type: none"> Coated galvanised steel and aluminium. Attachment kit and leading edge kit with reinforcing material on the pool cover ensure quality connections with the Rollup Station. Secured to paving by stainless steel anchor bolt and ground anchor. On castors/wheels for easy movement.
<p>1 EASYROLL 2 A lightweight, portable accessory that is slotted into the battens of the PowerPlastics Solid Safety Cover to streamline opening and closing of the pool. Suited to: pools fitted with the PowerPlastics Solid Safety Cover measuring up to 12m x 5.5m.</p>	<ul style="list-style-type: none"> The convenience of automation where the pool is covered by a PowerPlastics Pool Covers Solid Safety Cover. 	<ul style="list-style-type: none"> Push-of-the-button ease of use, this lightweight Rollup Station assists by automating the cover. Favoured by mothers with children as it allows one person to remove the PowerPlastics Solid Safety Cover. Extends lifespan of cover by preventing abrasive damage as the cover is tightly rolled up when off the pool. Not as expensive as the SafetyRoll. 	<ul style="list-style-type: none"> After slotting into the battens of the cover, the gear motor is engaged and rotates, and the battens open or close the pool for swimming. Comes with two batteries and a charger. Hinged legs for easy carrying and storage. Ratchet and strap for closing the pool.
<p>1 SAFETYROLL 2 A Rollup Station for the PowerPlastics Solid Safety Cover, making the use of the cover quick and easy, and ensuring correct storage when off the pool. Suited to: pools fitted with the PowerPlastics Solid Safety Cover over 6 metres wide..</p>	<ul style="list-style-type: none"> To automate the PowerPlastics Pool Covers Solid Safety Cover. 	<ul style="list-style-type: none"> Allows for easy removal of large covers by a single person. Ensures the cover is not dragged over the paving, avoiding abrasive wear and tear on the PVC and providing a protective storage solution to prolong the lifespan of the cover. 	<ul style="list-style-type: none"> Operates off a built-in 12V battery which is recharged from the mains. The charger is included. The retractable wheel axis is slotted into one of the cover's aluminium battens using adjustable straps. The user 'drives' the unit down the length of the pool, supporting the wheel's axis at the handles as the gear motor rotates the shaft. The entire unit can be easily moved after use to keep the pool surrounds clear.

PRODUCT COMPARISON TABLE: COVER ACCESSORIES

GYM, SCHOOL OR LARGE POOLS
ACCOMMODATES LANE COVERS
DOMESTIC POOLS
FOR USE WITH THE POWERPLASTICS SOLID SAFETY COVER

PRODUCT NAME	THIS POOL OWNER WANTS	BENEFITS	FEATURES
<p>1 WIND PROTECTION For domestic pools with thermal covers in areas subject to high or frequent winds.</p>	<ul style="list-style-type: none"> To prevent the cover lifting from the pool in high wind areas. To avoid having to remove the cover entirely once winds exceed 35km/hr (the wind threshold for covers without wind protection devices.) In winds over 65km/hr, the cover must be removed. 	<ul style="list-style-type: none"> Ensures that in strong winds the cover does not lift from the pool, something that can damage both the cover and pool surrounds. 	<p>A weighted 20cm skirt is attached to the cover, hanging downwards into the water. The weight ensures the cover maintains contact with the water at all times.</p>

PRODUCT COMPARISON TABLE: COVERS FOR COVERS

<p>COVERS FOR COVERS: THERMALS Recommended for thermal covers with and without Rollup Stations.</p>	<ul style="list-style-type: none"> To protect and extend a cover's lifespan through correct storage. 	<ul style="list-style-type: none"> One of the quickest ways to age a pool cover is to not store it correctly when off the pool. This storage cover ensures absolute protection and will significantly extend the lifespan of the thermal cover. 	<ul style="list-style-type: none"> Made from 550gsm PVC in blue, grey, green, beige, brown. Heavy duty Velcro fastening along the length. Draw strings at both ends to seal the cover.
<p>COVERS FOR COVERS: THE POWERPLASTICS SOLID SAFETY COVER Designed specifically for our solid cover with aluminium battens.</p>	<ul style="list-style-type: none"> To protect and extend a solid cover's lifespan through correct storage. 	<ul style="list-style-type: none"> Prevents premature ageing of the cover. Castors on this protective cover make it easily movable by one person. Also a great way to store thermal covers without Rollup Stations. 	<ul style="list-style-type: none"> Made from 550gsm PVC, in blue, grey, green, beige, brown. Webbing strap / handle at one end, stainless steel castors at the other end. Heavy duty Velcro fastening along the length.
<p>COVERS FOR COVERS: ROLLUP STATIONS For thermal covers with Rollup Stations.</p>	<ul style="list-style-type: none"> To protect and extend a cover and Rollup Station's lifespan with one protective cover. 	<ul style="list-style-type: none"> The entire Rollup Station sits in the casing and the sides are pulled up, protecting both the thermal cover and Rollup Station from harsh UV rays. 	<ul style="list-style-type: none"> Single opening on the top sealed with Velcro. Made from 550gsm PVC in blue, grey, green, beige, brown. Heavy duty Velcro fastening along the top.
<p>SOLAR PROTECTION SHEET Recommended for thermal covers with Rollup Stations.</p>	<ul style="list-style-type: none"> To protect and extend a cover's lifespan by minimising the solar/UV damage. 	<ul style="list-style-type: none"> This protective sheet effectively prevents the cover coming into contact with harsh UV rays, something that rapidly ages a thermal cover when not on the pool. 	<ul style="list-style-type: none"> Made from white polyethelene The sheet is placed on the rolled up cover when the cover is not in use, to prevent a heat build up and damage to the cover.
