THE POWERPLASTICS SOLID SAFETY COVER Your best defence against drowning

The PowerPlastics Solid Safety Cover is the single most effective physical barrier to prevent child drownings. No fiddly hooks and eyelets make this solid cover quick and easy to use - the most desirable choice over other available pool safety systems.

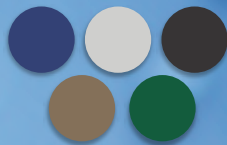

- **Strong and durable:** this cover is ASTM Certified and complies with international safety standards, with a weight tolerance of 220kg.
- **Simplicity of design & ease of use:** supported across the pool by aluminium battens that are secured within the PVC cover, one end is anchored into place with removable anchor bolts. The opposite end has corresponding ratchets which allow the cover to be tightened. For added convenience and single-person operation, automate the cover by adding the Vektor motorised Rollup Station.
- **Saves power:** by selecting a colour option with a black underside (Blue, Black, Brown and StoneGrey), the cover doubles up as energy-saving solution. Algae dies off due to the absence of light entry and the pool requires 50% less filtration. Also saves on water and chemicals.
- **Drainage system:** drainage holes prevent rain or sprinkler water forming a small pool on top of a cover, something which can pose a drowning risk for toddlers.
- **Childproof locking system:** a lockable strapping system makes it difficult for a small child to tamper with or attempt to release the cover.
- **Aesthetics:** comes in Blue, Black, Racing Green, Brown or StoneGrey, allowing the cover to match the overall feel of the home.

COLOUR CHOICES: Our selection of colour choices allow you to blend the PowerPlastics Solid Safety Cover into the pool's surrounds. Available in Blue, Black, Racing Green, Brown, StoneGrey.

THE SIGNATURE LABEL: custom printed safety covers

New in South Africa, pool owners can now enjoy a safe pool that is completely customised and styled to personal tastes! Using the latest innovations in print and production, this safety product combines our usual excellent workmanship of The PowerPlastics Solid Safety Cover with high-end printing for the ultimate in 'one-of-its-kind' pool and outdoor living areas. It has a 1-year warranty due to the printed element. You can expect a 3-year lifespan from this cover and its parts.

AUTOMATE THE POWERPLASTICS SOLID SAFETY COVER

Although the PowerPlastics Solid Safety Cover is fully workable without any form of automation, the Vektor Rollup Station does assist where the pool is being opened or closed by one person. It also ensures correct storage of the cover when it is not in use. Light, portable and the perfect accessory for our safety cover!

TOPSTEP - THE HOME OF POOL SAFETY

The pool safety industry needed a champion - TopStep is it! A one-stop educational blog for all things related to pool safety and drowning prevention, TopStep promotes swimming skills as a life skill, not a social skill, and educates on internationally recommended methods of pool safety. Please visit the TopStep page on Facebook and share your views, and assist in building a strong community of responsible pool owners dedicated to reducing the local child drowning statistics. The TopStep website also carries important tips on what to do in child drowning situations and how to prevent accidents. Learn more at www.topstep.co.za.

Layers of safety: 3 behaviours to safeguard children around the pool

1. ADULT SUPERVISION

2. POOL SAFETY DEVICES

3. SWIMMING SKILLS
